

Four-level proxy questionnaire (ASCOT-Proxy)

Introduction

The purpose of these questions is to measure the effect of care and support services on the lives of people who use them. By care and support services we mean people receiving home care, Personal Budgets, Direct Payments, attending a day centre, equipment, meals services or living in a care home. Where possible, we always ask people how they feel about their own lives. Because this is not always possible, it is useful to get another perspective, such as from a friend, relative or care worker who knows the person well, often spends time with the person, and knows about the care and support they receive. This is why you have been asked to fill in this questionnaire.

If you feel that you may not be the right person to fill in this questionnaire, or that someone else would be better placed to do so, then please contact us to let us know.

The questions will ask about different aspects of the person's life at the moment. First, you will be asked to say what you think about the topic. Please say **what you think** about that aspect of the person's life. Do this by ticking one box in the 'say what you think' column. Then you will be asked to say **how you think the person feels** about that aspect of life. Do this by ticking one box in the 'how I think this person would answer' column. This may be difficult for you to say. However, please try to answer these questions as best as you can.

At the end of each question there is a comments box. You do not need to fill this in, but if you would like to add any further information please do so.
