

UNIVERSITY OF KENT ETHNOBIOLOGY LAB COLLECTION

SCHOOL OF ANTHROPOLOGY AND CONSERVATION

CATALOGUE

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 1
Specimen No 200604
Date acquired 4/28/2006
Focal species *Oryza sativa* [POACEAE]
Description finger knife
Location Kiau, Sabah, Malaysia; Dusun ethnic group
Notes

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 2
Specimen No 200101
Date acquired 8/8/2001
Focal species *Arenga pinnata* [ARECACEAE]
Description Grated but unprocessed pith
Location Arenga starch processing factory, Pelabuhanratu, West Java, Indonesia
Notes

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 3
Specimen No 200102
Date acquired 8/11/2001
Focal species *Metroxylon sagu* [ARECACEAE]
Description processed starch
Location central market, Kota Menado, north Sulawesi, Indonesia
Notes imported from Sangihe-Talaud islands

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 4
Specimen No 200103
Date acquired 8/11/2001
Focal species *Metroxylon sagu* [ARECACEAE]
Description earthenware oven-mould used for Metroxylon sagu starch
Location bought in central market, Kota Menado, north Sulawesi, Indonesia
Notes imported from either Sangihe-Talaud islands or north Maluku

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 5
Specimen No 200605
Date acquired 4/28/2006
Focal species *Oryza sativa* [POACEAE]
Description local rice landrace; red
Location Nabalu market, Sabah, Malaysia; Dusun ethnic group
Notes bandal (Dusun) = padi Merah (Malay)

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 6
Specimen No 200606
Date acquired 4/28/2006
Focal species *Oryza sativa* [POACEAE]
Description local rice landrace; glutinous var.
Location Nabalu market, Sabah, Malaysia; Dusun ethnic group
Notes pulut tadong (Dusun) = beras pulut (Malay) Coll: R.F. Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 7
Specimen No 200607
Date acquired 4/28/2006
Focal species *Oryza sativa* [POACEAE]
Description local rice land race; black var.
Location Nabalu market, Sabah, Malaysia; Dusun ethnic group
Notes tadong bukit (Dusun) Coll: R. F. Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 8
Specimen No 200608
Date acquired 4/28/2006
Focal species *Oryza sativa* [POACEAE]
Description local rice land race; white var.
Location Nabalu market, Sabah, Malaysia; Dusun ethnic group
Notes tadong (Dusun) Coll: R.F. Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 9
Specimen No 200609
Date acquired 4/28/2006
Focal species *Oryza sativa* [POACEAE]
Description local rice landrace; black var. with husk largely removed
Location Nabalu market, Sabah, Malaysia; Dusun ethnic group
Notes tadong bukit (Dusun) Coll: R. F. Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 10
Specimen No 200610
Date acquired 3/2/2006
Focal species *Elleteria cardamomum* [ZINGIBERACEAE]
Description green cardamom

Location Hyderabad, India
Notes Coll: R. F. Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 11
Specimen No 200611
Date acquired 3/1/2006
Focal species *Elleteria cardamomum* [ZINGIBERACEAE]
Description black cardamom
Location Hyderabad, India
Notes Coll: R. F. Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 12
Specimen No 200612
Date acquired 10/2/2005
Focal species *Elaeis guineensis* [ARECACEAE], *Philodendron* [ARECACEAE]
Description Potiguara shrimp trap
Location Aldeia Cumaru, Terra Indigena, Potiguara, Paraiba, Brazil
Notes Local name: covo , Plants used: Body and spears made of leaves of *Elaeis guineensis* (local name dende or dendezeiro) woven together with a vine {rest is obscured}

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 13
Specimen No 200613
Date acquired 1/1/2005
Focal species *Oryza sativa* [POACEAE]
Description Short grain rice
Location Purchased in Canterbury
Notes Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 14
Specimen No 200614
Date acquired 1/1/2000
Focal species *Hordeum vulgare* syn. *H. sativum* [POACEAE]
Description barely
Location United Kingdom
Notes Pearl barley grain Purchased from Holland and Barrett. Best before June 2000 Coll: G. J. Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 15
Specimen No 200615
Date acquired 8/11/2004
Focal species *Camellia sinensis* [THEACEAE]
Description black tea
Location Turkey, imported for retail in United Kingdom
Notes Purchased in UK. Data on manufacturer and importer and instructions for preparation on label in jar. See Hann. Coll: R.F.Ellen

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 16
Specimen No 200638
Date acquired 6/1/2006
Focal species *Cicer arietinum* [FABACEAE]
Description dried seed
Location Hyderabad?
Notes

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 17
Specimen No 200637
Date acquired 8/30/2006
Focal species *Myristica fragrans* [MYRISTICACEAE]
Description long nutmeg
Location Maluku, probably East Seram
Notes Donated by: R.F.Ellen. Probably purchased Ambon market 1996

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 18
Specimen No 200636
Date acquired 8/30/2006
Focal species *Juglans regia* [JUGLANDACEAE]
Description walnut, fruit
Location Crockshard Farmhouse, Wingham, Kent
Notes Donated by: R.F.Ellen

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 19
Specimen No 200616/2001.04
Date acquired 6/1/2001
Focal species *Iris tenuifolia* [IRIDACEAE]
Description "Monospharma" Products: NEPHRAMON; Preparation: extract (CH₂OH 50%) 30ml. Prescribed uses: kidney diseases, kidney purification against some poisons. This product is now on clinical trial and may be ready by the end of the year.
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to: "Impact of harvesting on thirteen wild medicinal plants used for commercial purposes by a pharmaceutical enterprise in Mongolia."

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 20
Specimen No 200616/200617/2001-05
Date acquired 6/1/2001
Focal species *Crataegus sanguinea* [ROSACEAE], *Valeriana officinalis* [VALERIANACEAE], *Erysimum altaicum* [CRUCIFERAE]
Description "Monospharma" Products: ERVALCOR. Preparation: extract (CH₂OH 70%) 30ml, administered by drops (10-15 drops/day). Prescribed uses: Heart diseases, arrhythmia and deficient function of the heart.
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to: "Impact of harvesting on thirteen wild medicinal plants used for commercial purposes by a pharmaceutical enterprise in Mongolia."

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 21
Specimen No 200618/2001-06
Date acquired 6/1/2001
Focal species *Rhodiola quadrifida* [BRASSICACEAE]
Description "Monospharma" Products: RODIOLA EXTRACT. Preparation: extract (CH₂OH 70%) 30ml. Prescribed uses: Increases body resistance against weakness
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to: Impact of harvesting on thirteen wild medicinal plants used for commercial purposes by a pharmaceutical enterprise in Mongolia."

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 22
Specimen No 200619/2001-07
Date acquired 6/1/2001
Focal species *Valeriana officinalis* [VALERIANACEAE]
Description "Monospharma" Products: VALERIANA EXTRACT. Preparation: extract (CH₂OH 70%) 30ml, administered by drops (10-15 drops/day). Prescribed uses: Against nervousness and irritability
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to: "Impact of harvesting on thirteen wild medicinal plants used for commercial purposes by a pharmaceutical enterprise in Mongolia."

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 23
Specimen No 200620/2001-08/200518
Date acquired 6/1/2001
Focal species *Crataegus sanguinea* [ROSACEAE]
Description "Monospharma" Products: CRATAEGUS. Preparation: extract (CH₂OH 70 %) 30ml, administered by drops (10-15 drops/day) Prescribed uses: Against high pressure, arrhythmia
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to: "Impact of harvesting on thirteen wild medicinal plants used for commercial purposes by a pharmaceutical enterprise in Mongolia."

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 24
Specimen No 200621/2001-09/200519
Date acquired 6/1/2001
Focal species *Glycyrrhiza uralensis* [FABACEAE], *Thermopsis lanceolata* [FABACEAE]

Description "Monospharma" Products: CHITAMON. Preparation: syrup 100ml
Prescribed uses: Chronic bronchitis, chronic inflammation of lungs
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to:
"Impact of harvesting on thirteen wild medicinal plants used for
commercial purposes by a pharmaceutical enterprise in Mongolia."

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 25
Specimen No 200622/2001.10/200515
Date acquired 6/1/2001
Focal species *Oxytropis pseudo-glandulosa* [FABACEAE], *Stellera chamaejasme*
[THYMELIACEAE], *Ephedra przewalskii* [EPHEDRACEAE]
Description "Monospharma" Products: DENTAMON. Preparation: extract of three
plants in (CH₂OH 30%) 100ml, gargle with the solution. Prescribed
uses: toothache, gum inflammation
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to:
"Impact of harvesting on thirteen wild medicinal plants used for
commercial purposes by a pharmaceutical enterprise in Mongolia."

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 26
Specimen No 200623/2001.11
Date acquired 6/1/2001
Focal species *Plantago major* [PLANTAGINACEAE]
Description "Monospharma" Products: PLANTAGO AND HONEY. Preparation:
Syrup 100ml extraction with fresh plants. Prescribed uses: Stomach
diseases, gastritis and peptic ulcer.
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to:
"Impact of harvesting on thirteen wild medicinal plants used for
commercial purposes by a pharmaceutical enterprise in Mongolia."

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 27
Specimen No 200624/2001.12/200520
Date acquired 6/1/2001
Focal species *Rosa acicularis* [ROSACEAE]
Description "Monospharma" Products: NATURVIT. Preparation: Syrup 100ml for
children. Prescribed uses: Multivitamin syrup, immunostimulant,
against weakness.
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to:
"Impact of harvesting on thirteen wild medicinal plants used for
commercial purposes by a pharmaceutical enterprise in Mongolia."

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 28
Specimen No 200625/2001-13/200514

Date acquired 6/1/2001
Focal species *Salsola laricifolia* [CHENOPODIACEAE]
Description "Monospharma" Products: SALIMON. Preparation: extract (CH₂OH 70%) 100ml. Prescribed uses: used after X-ray, chemotherapy or cytostatic therapy, acts like an immunostimulant.
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to: "Impact of harvesting on thirteen wild medicinal plants used for commercial purposes by a pharmaceutical enterprise in Mongolia."

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 29
Specimen No 200626/2001-14
Date acquired 6/1/2001
Focal species *Astragalus variabilis* [FABACEAE]
Description "Monospharma" Products: ASTRADIN. Preparation: Tablet to take 3 times/day, cure of 28 days. Prescribed uses: Cardio-protected action, protects the heart, myocardite, ichiémie
Location Mongolia
Notes Collector: LAROCHE Sophie, MSc Ethnobotany 2001. Appendix to: "Impact of harvesting on thirteen wild medicinal plants used for commercial purposes by a pharmaceutical enterprise in Mongolia."

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 30
Specimen No 200627/2001.15
Date acquired
Focal species
Description Feather head-decoration from the Umutina (Bororo)
Location State of Mato Grosso, Central Brazil
Notes Coll: Tamar Bajgielman.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 31
Specimen No 200628/2001.16
Date acquired
Focal species bamboo [POACEAE]
Description oval-woven basket, made of two halves hinged together, which close to form a bag/carrier.
Location
Notes Collected by Ugyen (MSc Ethnobot 1999)

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 32
Specimen No 200629/2001-17
Date acquired 1/1/1999
Focal species palm leaf?? [ARECACEAE]
Description Hat, cube-shaped
Location Madagascar
Notes Collector: RF Ellen; collected 1999

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 33
Specimen No 200630/2001-18
Date acquired
Focal species
Description wooden pipe
Location Brazil
Notes Collector: Tamar Bajgielman.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 34
Specimen No 200631/2001-19
Date acquired
Focal species *Bixa orellana* L. [BIXACEAE] 'lipstick tree'
Description Bamboo container holding red paste made from focal species. used as decorative face painting

Location
Notes

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 35
Specimen No 200632/2001-20
Date acquired 1/1/1999
Focal species Bamboo ???? [POACEAE]
Description set of three bamboo baskets
Location Bandar seri Begawan, Dusun, Brunei ??????????
Notes Collector: RF Ellen.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 36
Specimen No 200633
Date acquired 8/22/2003
Focal species *Canarium commune* L. [BURSERACEAE]
Description Kenari nuts, purchased, said to originate from Banda
Location Amboina market, Jalan Diponegoro, Ambon, central Maluku, Indonesia

Notes

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 37
Specimen No 200634
Date acquired 8/16/2003
Focal species *Sus scrofa* [SUIDAE]
Description pig's canine
Location Rouhua, Amahai (south Seram) sub district, Seram, central Maluku, Indonesia
Notes Specimen located in Ellen collection of Nuaulu ethnozoology, drawer 18, plan chest 3.

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 38
Specimen No 200635
Date acquired 8/16/2003
Focal species
Description bush cricket
Location Rouhua (Nuauulu), Amahai (South Seram) sub district, Seram, Maluku, Indonesia
Notes Specimen located in Ellen collection of Nuauulu ethnozoology, drawer 18, plan chest 3.

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 39
Specimen No 200639
Date acquired 11/9/2006
Focal species *Catharmus tinctorius* [ASTERACEAE]
Description dried flower head
Location herbalist, Chiang Rai, Thailand
Notes medicinal; purchased

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 40
Specimen No 200640
Date acquired 11/9/2006
Focal species *Ganoderma lucidum* [Ganodermataceae]
Description dried and sliced bracket fungus
Location herbalist, Chiang Rai, Thailand
Notes medicinal; purchased

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 41
Specimen No 200641
Date acquired 11/9/2006
Focal species *Glycyrrhiza* sp [FABACEAE]
Description dried twig
Location herbalist, Chiang Rai, Thailand
Notes medicinal; purchased

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 42
Specimen No 200642
Date acquired 8/9/2006
Focal species *Lens culinaris* [FABACEAE]
Description dried seeds
Location
Notes purchased in UK

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 43
Specimen No 200643
Date acquired 6/1/2006
Focal species
Description dried seeds

Location Hyderabad, India
Notes sukh mukh; purchased

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation
Record 44
Specimen No 200644
Date acquired 6/1/2006
Focal species *Foeniculum vulgare* Mill. [APIACEAE]
Description dried seeds
Location Hyderabad, India
Notes saunf; purchased

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation
Record 45
Specimen No 200645
Date acquired 4/1/2007
Focal species *Boswellia* sp. [BURSERACEAE]
Description resin
Location Jerusalem, Palestine/Israel
Notes frankincense; purchased

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation
Record 46
Specimen No 200646
Date acquired 4/1/2003
Focal species *Illicium verum* Hook.f. [ILLICACEAE]
Description oil in bottle
Location Ambon, Indonesia
Notes Minyak Kulit Lawang, 'Komodo' brand; purchased

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation
Record 47
Specimen No 200467
Date acquired 1/22/2002
Focal species *Zizania latifolia* [POACEAE]
Description dried seeds
Location Canada
Notes 'Organic wild rice'. Packing label included.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation
Record 48
Specimen No 200468
Date acquired 9/1/2005
Focal species *Commiphora myrrha* [BURSERACEAE]
Description resin
Location Addis Ababa, Ethiopia
Notes myrrh; wrapping paper included

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation
Record 49

Specimen No 200469
Date acquired 11/1/2000
Focal species *Triticum aestivum* [POACEAE]
Description threshed and dried grain
Location United Kingdom
Notes wheat grain; organic; packing label included

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 50
Specimen No 200470
Date acquired 2/5/2000
Focal species *Medicago sativa* [FABACEAE]
Description dried seeds
Location Canada
Notes alfalfa seeds; organic; packing label included

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 51
Specimen No 200471
Date acquired 3/31/2000
Focal species *Vigna radiata* [FABACEAE]
Description dried seeds
Location Australia
Notes dried mung beans; packing label included

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 52
Specimen No 200472
Date acquired 10/7/2000
Focal species *?Phaseolus vulgaris* [FABACEAE]
Description dried seeds
Location United States of America
Notes black turtle beans; organic; packing label included

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 53
Specimen No 200473
Date acquired 6/1/2000
Focal species *Oryza sativa* [POACEAE]
Description dried grains
Location Italy
Notes short grain brown rice; organic; packing label included

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 54
Specimen No 200474-1
Date acquired 8/9/2000
Focal species *Zea mays* [POACEAE]
Description dried seeds
Location France

Notes popping corn; organic; packing label included

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 55
Specimen No 200474-2
Date acquired 9/30/2000
Focal species *Eriogonum* sp [POACEAE]
Description dried seeds
Location United States of America
Notes buckwheat groats; organic; packing label included

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 56
Specimen No 200475
Date acquired 5/31/2000
Focal species *Lens culinaris* [FABACEAE]
Description dried seeds
Location Turkey
Notes continental lentils; packing label included

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 57
Specimen No 200475
Date acquired 8/25/2002
Focal species *Aspalathus linearis* (Burm.f.), *A. contaminatus*
[POACEAE]
Description dried and finely-chopped leaf
Location South Africa
Notes Rooibosch tea; organic; packing label included

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 58
Specimen No 200477
Date acquired 1/1/2006
Focal species *Cinnamomum zeylanicum* [LAURACEAE]
Description dried bark
Location Sri Lanka
Notes cinnamon sticks; packing label included

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 59
Specimen No 200478
Date acquired 5/1/2006
Focal species *Cuminum cyminum* L. [UMBELLIFERAE]
Description dried seeds
Location Hyderabad, India
Notes jeera; cumin; packing label included

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 60
Specimen No 200479
Date acquired 9/1/2005

Focal species *Triticum* L. [POACEAE]
Description dried seeds, roasted
Location Addis Ababa airport, Ethiopia
Notes qola [Amharic]; roasted wheat grain

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 61
Specimen No 200480
Date acquired 9/1/2005
Focal species
Description mixed crushed resins
Location UK
Notes mixed Prinknash incense

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 62
Specimen No 200481
Date acquired 9/1/2005
Focal species k.o. bean [FABACEAE]
Description dried black beans
Location purchased in UK
Notes

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 63
Specimen No 200482
Date acquired 9/1/2005
Focal species k.o. bean [FABACEAE]
Description dried brown beans
Location purchased in UK
Notes

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 64
Specimen No 200483
Date acquired 9/1/2005
Focal species *Corylus avellana* L. [BETULACEAE (CORYLACEAE)]
Description edible seeds in nuts
Location Crockshard Farmhouse, Wingham, Kent
Notes Kentish Cob

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 65
Specimen No 200484
Date acquired 1/15/2004
Focal species *Foeniculum vulgare* Miller, *Foeniculum officinale* L. [UMBELLIFERAE]
Description edible seeds

Location various countries of origin; purchased Canterbury, Kent, Uk
Notes fennel; packing label included

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 66
Specimen No 200485
Date acquired 2/13/2006
Focal species *Coriandrum sativum* L. [UMBELLIFERAE]
Description dried edible seeds
Location Hyderabad, India
Notes coriander; packing including

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 67
Specimen No 200602
Date acquired 4/28/2006
Focal species *Oryza sativa* L. [POACEAE]
Description local rice landrace; white var
Location Nabalu market, Sabah, Malaysia; Dusun ethnic group
Notes tadong (Dusun); Coll: R.F. Ellen; packing data; including price

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 68
Specimen No 200486
Date acquired 8/1/2000
Focal species *Oryza sativa* L. [POACEAE]
Description local rice landrace; white var
Location Lundayeh, Long Pasia, Sabah, Malaysia
Notes Coll: Alison Hoare

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 69
Specimen No 200487
Date acquired 9/2/2000
Focal species *Phaseolus angularis* [FABACEAE]
Description dried seeds
Location produce of China; purchased Canterbury
Notes aduki beans (organic); packing label included; Coll: Gary Martin

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 70
Specimen No 200488
Date acquired 9/2/2000
Focal species *Theobroma cacao* L. [STERCULIACEAE]
Description processed product of fruit, some wrapped in dried leaves [probl. Musa sp.]
Location Oaxaca, Mexico
Notes chocolate; Coll: Gary Martin

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 71
Specimen No 200489
Date acquired 12/31/2004
Focal species *Mangifera indica* [ANACARDIACEAE]

Description processed product of fruit, sugar and salt added
Location Oaxaca, Mexico
Notes dried mango; packing included; Coll: Roy Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 72
Specimen No 200490
Date acquired 7/20/2005
Focal species *Ceratonia siliqua* L. [FABACEAE]
Description seed pods collected from base of tree which had shed them
Location Jnane Tsma, Dar Yiane, Marrakech, Morocco
Notes carob pods; Coll: Roy Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 73
Specimen No 200491
Date acquired 7/20/2005
Focal species *Phaseolus vulgaris* [LEGUMINOSAE]
Description dried seed
Location USA; purchased Canterbury, UK
Notes pinto beans (organic); packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 74
Specimen No 200492
Date acquired 4/20/2000
Focal species *Lens culinaris* [FABACEAE]
Description dried split seed
Location Turkey; purchased Canterbury, UK
Notes red split lentils; packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 75
Specimen No 200493
Date acquired 4/20/2000
Focal species *Corylus maxima* [CORYLACEAE]
Description dried nuts; intact bunches
Location Crockshard Farmhouse, Kent, UK
Notes Kentish cobs; Coll: Roy Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 76
Specimen No 200494
Date acquired 2/1/2000
Focal species *Lens culinaris*; syn *Lens esculenta* [FABACEAE]
Description dried brown seeds
Location Produce of Canada; purchased Canterbury, UK

Notes Whole Green Lentils; packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 77
Specimen No 200495
Date acquired 6/1/2000
Focal species *Glycine max* [FABACEAE]
Description dried seeds
Location Produce of USA; purchased Canterbury, UK
Notes Soya Beans (organic); packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 78
Specimen No 200496
Date acquired 12/1/2000
Focal species *Chenopodium quinoa* [CHENOPODIACEAE]
Description dried seeds
Location Produce of Bolivia; purchased Canterbury, UK
Notes Quinoa (organic); packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 79
Specimen No 200497
Date acquired 10/7/2000
Focal species *Avena sativa* [POACEAE]
Description dried seeds
Location Produce of UK; purchased Canterbury, UK
Notes oat groats (organic); packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 80
Specimen No 200498
Date acquired 10/31/2000
Focal species *Panicum miliaceum* [POACEAE]
Description dried seeds
Location Produce of USA; purchased Canterbury, UK
Notes millet grain (organic); packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 81
Specimen No 200499
Date acquired 1/1/2001
Focal species *Phaseolus lunatus* [FABACEAE]
Description dried seeds
Location Produce of China; purchased Canterbury, UK
Notes butter beans (organic); packing label included; Coll: Gary Martin

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 82
Specimen No 200500
Date acquired 1/1/2001
Focal species *Prunus dulcis* (Miller) D. Webb [ROSACEAE]

Description dried seeds
Location Produce of UK
Notes almond; Coll: Roy Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 83
Specimen No 200501
Date acquired 1/1/2001
Focal species *Camellia sinensis* [THEACEAE]
Description young leaves, steamed/panfried, dried/different levels of fermentation
Location China
Notes tea; Coll: Roy Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 84
Specimen No 200502
Date acquired 1/1/2001
Focal species *?Ricinus communis* [EUPHORBIACEAE]
Description dried seeds
Location Purchased in Canterbury, UK
Notes castor oil plant?; Coll: Gary Martin

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 85
Specimen No 200503
Date acquired 3/1/2006
Focal species *Elettaria cardamomum* [ZINGIBERACEAE]
Description white cardamom
Location Hyderabad, India
Notes Coll: R.F. Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 86
Specimen No 200504
Date acquired 3/1/2006
Focal species *?Camellia* sp. [THEACEAE]
Description dried leaf and stalk
Location
Notes

School of Anthropology and Conservation

Record 87
Specimen No 200505
Date acquired 3/1/2006
Focal species *Rosmarinus officinalis* L. [LABIATAE]
Description dried leaf

Location
Notes Coll: R. F. Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 88
Specimen No 200506
Date acquired 3/1/2006
Focal species *Argania spinosa* (L.) Skeels [SAPOTACEAE]
Description seed, as passed through goat gut
Location nr. Marrakech, Morocco
Notes Coll: S. Kaleta

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 89
Specimen No 200507
Date acquired 3/1/2006
Focal species *Argania spinosa* (L.) Skeels [SAPOTACEAE]
Description oil (possibly diluted)
Location nr. Marrakech, Morocco
Notes extracted from argan nuts at female cooperative
Coll: Roy Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 90
Specimen No 200508
Date acquired 3/1/2006
Focal species *Tamarindus indica* [FABACEAE]
Description dried fruit in pod
Location Hyderabad, India
Notes Coll: Roy Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 91
Specimen No 200509
Date acquired 3/1/2003
Focal species *Tamarindus indica* [FABACEAE]
Description Tamarind, part dried fruit
Location Indonesia
Notes Coll: Roy Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 92
Specimen No 200510
Date acquired 3/1/2003
Focal species *Saccharum officinarum* L. [POACEAE]
Description distilled spirit in bottle wrapped in banana? leaf; cork stopper; string
around neck attaching small calabash or gourd dipper.
Location Serro, Mata Grosso, Brazil
Notes Paper label: 'Pinga do Serro'; Coll: Tamar Bajgielman

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 93

Specimen No 200511
Date acquired 3/1/2003
Focal species *Erythroxylum coca* Lam. [ERYTHROXYLACEAE]
Description coca pomade or cream in alcohol
Location Bolivia
Notes Packing label including; Coll: Miguel Alexiades

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 94
Specimen No 200512
Date acquired 6/1/2001
Focal species *Valeriana officinalis* Lam. [VALERIANACEAE]
Description Preparation: extract in (CH₂OH 760%); glass bottle
Location Mongolia
Notes Valeriana extract; Monospharma Monogolia. Administered by drops (10-125 drops/day).
Prescribed uses: against nervousness and irritability. Coll: Sophie Laroche

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 95
Specimen No 200513
Date acquired 6/1/2001
Focal species *Plantago major* Lam. [PLANTAGINACEAE]
Description Preparation: syrup 100 ml extraction with fresh plants; glass bottle, metal screwtop
Location Mongolia
Notes Plantago and honey; Monospharma Monogolia. Prescribed uses: stomach diseases, gastritis and peptic ulcer; Coll: Sophie Laroche

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 96
Specimen No 2001.35
Date acquired 15-07-01
Focal species *Coccothrinax barbadensis* [ARECACEAE]
Description Handbrush made from palm leaves and bound with Industrial twine
Location Mon Reponse, Micoud, St. Lucia
Notes Coll: Laurent Jean-Pierre, MSc Ethnobot 1999.
Craftsmen Mr William William.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 97
Specimen No 2016.109
Date acquired 00-02-2003
Focal species *Viscum album* [SANTALACEAE]
Description 30 g Mistletoe herb tea sachets in packing
Location Germany
Notes Manufactured by Salus-Haus

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 98
Specimen No 200514
Date acquired 6/1/2001
Focal species *Rhodiola quadrifida* [BRASSICACEAE]
Description
Location Mongolia
Notes Rhodiola extract. Monospharma Monogolia. Prescribed uses: increases body resistance, against weakness. Coll: Sophie Laroche.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 99
Specimen No 200515
Date acquired 6/1/2001
Focal species *Astragalus variabilis* [FABACEAE]
Description
Location Mongolia
Notes Astradin. Monospharma Monogolia. Prescribed uses: cardio-protected action. protects the heart, myocardite, ichiemie. Coll: Sophie Laroche

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 100
Specimen No 2016.108
Date acquired 00-07-2015
Focal species *Camellia sinensis* [THEACEAE]
Description '50 g Silver Needle' Chinese White Tea
Location China
Notes Whittard of Chelsea

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 101
Specimen No 200517(2001.4)
Date acquired 6/1/2001
Focal species *Iris trematolia* [IRIDACEAE]
Description Preparation: extract (CH₂OH 50%) 30 ml.
Location Mongolia
Notes Nephramon; Monospharma Monogolia; Prescribed uses: kidney diseases, kidney purification, purification against some poisons. This product is now on clinical trial and may be ready by the end of the year. Coll: Sophie Laroche.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 102
Specimen No 2001.21
Date acquired 00-08-2001
Focal species
Description Matipu fish trap
Location Xingu, Mato Grosso, Brazil
Notes Coll. Tamar Bajgielman

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 103
Specimen No 2015.72
Date acquired
Focal species Uncaria Tomentosa (RUBIACEAE)
Description 'Uña de Gato', Renacer, 50 g
Location Peru
Notes dried medication for treatment of cancer, gastric ulcers, arthritis, rheumatism, and general inflammation

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 104
Specimen No 2014.076
Date acquired
Focal species
Description Pomada para Rumas-Inflama, Badera Abierta
Location Mexico
Notes Ingredients: Vaseline, alcanfor, crystalline methol. Coll. Graciela Alcantara-Salinas

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 105
Specimen No 200521
Date acquired 2/26/2004
Focal species *Iris foetidissima* L. [IRIDACEAE]
Description Whole plant in Kew mixture
Location Firestone Copse, Isle of White, UK
Notes See label on jar. Culpepper reports use for menstrual cramps, as pessary and as abortifacient. Coll: Jenny Bruce.

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 106
Specimen No 200522
Date acquired 7/21/2007
Focal species *Stevia rebaudiana* Bertoni. [ASTERACEAE]
Description Commercially process extract in plastic jar.
Location La Paz, Bolivia
Notes See label on jar. See notes in University of Kent Ethnobiology Lab Archive Collection, under Stevia. Coll: Miguel Alexiades

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 107
Specimen No 200523
Date acquired 7/21/2007
Focal species *Salvia anchera* Benth var *canescens* [LABIATAE]
Description Dried leaves and stalks of sage.
Location Morocco
Notes Coll. Bernadette Montanari

University of Kent Ethnobiology Lab Collection

School of Anthropology and Conservation

Record 108
Specimen No 200524
Date acquired 7/21/2007
Focal species *Salvia saturooides* [LABIATAE]
Description Dried leaves and stalks of thyme
Location Morocco
Notes Coll: Bernadette Montanari

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 109
Specimen No 200525
Date acquired 3/2/2006
Focal species *Illicium anisatum* L. [ILLICACEAE]
Description Dried seeds in a plastic bag. Corn pudol. See information on label
Location Hyderabad, India
Notes Coll: Roy Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 110
Specimen No 200526
Date acquired 6/24/2004
Focal species *Ischnosiphon gracilus* L. [MARANTACEAE] poss *I. arouma* (RFE)
Description Round basket depicting 'Awarapyot' design (fox footprint), with brown Jequitiba dye (*Cariniana* sp. [LECYTHIDACEAE]). Contains other vines and cotton (*Gossypium barbadense* L. [MALVACEAE]).
Location Kaiabi (Tupi-Guarani), Xingu Indigenous Park, Amazon, Brazil
Notes Made by Owit Kaiabi (in memorium). Coll: Simone Athayde.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 111
Specimen No 200527
Date acquired 1/1/2075
Focal species
Description Skirt made from leaves. Green, yellow and purple dye - faded.
Location Vanuatu (New Hebrides)
Notes Coll: Alan Smith (contact details: email alanandivonne@latinmail.com; Servativestr. 51 53175 Bonn, Germany).

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 112
Specimen No 200528/200537
Date acquired 1/1/2075
Focal species indeterminate grass [POACEAE]
Description Two mats made from grass
Location Ndebele, Zimbabwe
Notes Coll: Joy Childs, gift from Roy Ellen.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 113
Specimen No 200529

Date acquired 1/1/2075
Focal species indeterminate grass [POACEAE]
Description Round basket coiled from grass. Faded dyed pattern.
Location Ndebele, Zimbabwe.
Notes Coll: Joy Childs, gift Roy Elle

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 114
Specimen No 200530
Date acquired 5/3/81
Focal species indeterminate bamboo [POACEAE] and rattan [ARECACEAE], and at least two other unidentified plants:
Description Round basket made mainly of bamboo with bark strap: takiri, carrying basket used for kenari (*Canarium indicum*) nutmeg and similar. See Ellen notebook 1981-05-17 (material culture).
Location Goyau, Banda Besar, Maluku, Indonesia
Notes Coll Roy Ellen

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 115
Specimen No 200531
Date acquired 3/7/2008
Focal species indeterm. timber, probl. hornbeam (*Carpinus betulus* L. (BETULACEAE))
Description branch cut for use as hook. Bark retained.
Location Crockshard Farmhouse, Wingham, East Kent, UK
Notes Coll: Roy Ellen. Date before 1980, probably 1940-50s or before. Used in agricultural work. Some woodworm: treated.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 116
Specimen No 200532
Date acquired 3/7/2008
Focal species indeterm. timber, probl. ash (*Fraxinus excelsior* L. [OLEACEAE]) or hazel (*Corylus* sp [BETULACEAE (CORYLACEAE)])
Description branch cut for use as hook. Bark retained; bale or sack hook.
Location Crockshard Farmhouse, Wingham, East Kent, UK
Notes Coll: Roy Ellen. Date before 1980, probably 1940-50s or before. Used in agricultural work. Some woodworm: treated. 'Bagging hook' or 'Brishing hook'.

University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation

Record 117
Specimen No 200533
Date acquired 2/13/2006
Focal species unidentified wood, probl. hornbeam (*Carpinus betulus* L., BETULACEAE)
Description bale or sack hook
Location Crockshard Farm, Wingham, Kent, UK
Notes before 1980

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 118
Specimen No 200534
Date acquired 1/1/1996
Focal species *Ficus* sp. [MORACEAE] with *Cocos nucifera* [ARECACEAE]
Description Woven string bag with handle
Location Baduy, West Java
Notes Coll: Roy Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 119
Specimen No 200535
Date acquired 13/3/90
Focal species *Ficus* sp. [MORACEAE]
Description Woven string bag with shoulder/head strap. Striped dye pattern.
Location Wamena, but purchased in Biak.
Notes Coll: Roy Ellen. See ELLEN FN 1990-03-09.

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 120
Specimen No 200536
Date acquired 1/1/1996
Focal species *Ficus* sp. [MORACEAE] with *Cocos nucifera* [ARECACEAE]
Description Woven string bag with handle; second of two.
Location Baduy, West Java
Notes Coll: Roy Elle

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 121
Specimen No 200537
Date acquired 1/1/1996
Focal species *Ficus* sp. [MORACEAE]
Description Woven string bag dyed with stripes
Location Vanimo, NW Papua New Guinea
Notes Coll. Stefanie Klappa; gift from Roy Ellen

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 213
Specimen No 2015.66
Local name:
Description: English ivy (*Hedera helix* [ARALIACEAE]).
Date acquired: 00-03-2016
Place: Holborn, London, UK
Storage location: University of Kent Ethnobiology Lab,
Notes: Circllet made of English Ivy, collected near Red Lion Square. Worn by another participant and myself during Pagan Pride 2013, 2 June. Participants walked from Red Lion Square to Russell Square before dancing around a May pole to celebrate the Spring. Known as Gort in Ogham (a Celtic system of divination and measurement of the lunar calendar), Ivy shows transformation, perseverance, and strength through persistence, presides over 30 Sept to 27 Oct (the 11th lunar month). And is associated with Saturn, Dioysus, and the Cornn God. Collected by Katheryn Salter, 19 June 2013. [1.0 KRS] Plants used in contemporary English Pagan practice.

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 214

Specimen No 2015.67

Local name:

Description: Mistletoe (*Viscum album* [VISCACEAE]).

Date acquired: 00-03-2016

Place: Treadwell's, London, UK

Storage location: University of Kent Ethnobiology Lab,

Notes: Associated with health, fertility, and the magic of liminal spaces, as it never touches the ground, existing between worlds in the branches of a tree (usually oak or apple). It has connections to the sacrificial king and the legendary Balder. Also called Golden Bough, Kissing Bough, and ALLheal, as it was once used as a cure-all. It is known for fertility as the white berries excrete a semen-like substance and hang between the plant's leaves in pairs. Mistletoe is especially sacred to Druids and must be harvested carefully and with full respect for the plant, often using a special ceremonial scythe, traditionally golden. Collected by Katheryn Salter, 17 June 2013. [1.0 KRS] Plants used in contemporary English Pagan practice. Price 45p Treadwell's, London.

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 215

Specimen No 2015.68

Local name:

Description: Quassia (*Aeschrion (Picraena excelsa)* [SIMAROUBACEAE]).

Date acquired: 00-03-2016

Place: C ollected from a stall-holder at the Pagan Federation, Strud Conference, 12 May 2013, UK

Storage location: University of Kent Ethnobiology Lab,

Notes: Used to promote positive, loving energy and sometimes used to attract good luck. Collected by Katheryn Salter. Plants used in contemporary English Pagan practice.

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 216

Specimen No 2015.69

Local name

Description Berries of Hawthorn (*Crataegus monogyna* [ROSACEAE]).

Date acquired 00-03-2016

Place Collected from a stall-holder at the Pagan Federation, Strud Conference, 12 May 2013, UK

Storage location University of Kent Ethnobiology Lab,

Notes Association with regulation of heart conditions, medicinally and purity, chastity, innocence, and preparation magically. Often called 'May', the Hawthorn (Huath in Ogham) is seen to usher in summer and has great significance in May Day celebrations as well as association with the Maiden aspect of the Triple Goddess (Maide, Mother, Crone), as well as Flora and Blodeuwedd. It is also one of three major trees for the Druids, the others being Ash and Oak. Collected by Katheryn Salter, 17 June 2013. Plants used in contemporary English Pagan practice.

**University of Kent Ethnobiology Lab Collection
School of Anthropology and Conservation**

Record 217
Specimen No 2015.70
Local name
Description Ash leaves (*Fraxinus excelsior* [OLEACEAE]).
Date acquired 17-06-2013
Place
Storage location University of Kent Ethnobiology Lab,
Notes One of three prominent trees for druids, the others being oak and hawthorn, prompting the saying 'by oak, ash and thorn' that is sometimes heard at gatherings. Ruling 18 Februar to 17 March, the third lunar month, it is strongly associated with Odin, and has long been considered the Uygdrasil, or world/cosmic tree in Nordic mythology. Collected by Katheryn Salter, 17 June 2013. Plants used in contemporary English Pagan practice.

Record 218
Specimen No 2015.71
Local name
Description Clary sage (*Salvia sclare* [LAMIACEAE]).
Date acquired 19-06-2013
Place 12 May 2013, UK
Storage location: University of Kent Ethnobiology Lab,
Notes: Aromatic yellow flowers and green foliage. Used as a cleansing agent, purifying the air and energy of a place and, by extension, those within it. Collected by Katheryn Salter, 17 June 2013. Plants used in contemporary English Pagan practice. The smudge sticks were created by a homeless man living in Glastonbury from materials foraged from the surrounding countryside and sold to both locals and tourists. When speaking to one of Kathryn Salter's contacts, he said that these examples were far superior to those usually sold in high street shops. All smudge sticks are burned to fully release their properties, though they maintain high levels of aromatic oils when fresh, noticeable even without the incineration process. To light, the end is held over a flame until it begins to smoke, then is blown out. The cleansing commences and as a final act, the end is extinguished in sand or left to burn out on its own.
